**RFP #2025-11080**  
**HPT Markers and Light Poles**

Question #	Document Section	Page Number	Question	STA Response
1			All callouts in drawings reference "Future Systems Inc or FSI to provide". Please confirm that these references should be replaced with "Bidder" to provide these items.	Correct
2			Are all references of STA to provide or to be provided by others still valid?	Yes
3			What are the LED panels and LED Mounting Panels behind the push thru logos at the top of the markers? 1. Are these LED panels provided by others? 2. If Bidders are to provide this item, please identify specifications for LED panels.	Yes, both the LED panel and mounting panel are provided by others.
4			If Bidders are to include all high-performance vinyl wrap that is installed by STA, how should these be delivered and stored for installation at a later date?	The bidder is only responsible for wrapping the acrylic "bug logo" and "push through lettering logo" for both HPT and City Line markers.
5			Does the vinyl wrap the entire marker (top to bottom, on all surfaces) or just the lower sections below the push thru header panel?	All exterior surfaces of the marker will be wrapped.
6	1.7	7	Marker Map Holder: FSI 0812-301-01 (and -04 & -05) on page 80 appears to be a proprietary extrusion manufactured by FSI. Please advise if STA owns and will provide this extrusion or if a substitution for this extrusion to hold in the glass for the insert would be acceptable.	Bidder is responsible for providing the map case. A substitution would be acceptable subject to approval. The same functionality would need to be maintained to provide access to the map case without having to remove any cladding panels. Please remember to utilize Attachment B Request for Approved Equals, Clarifications or Changes as referenced in section 1.7 of the RFP document.
7			Are these HPT Markers replacing existing City Line Markers or are these new for HPT?	These would be for new and/or replacement of existing HPT markers. However, City Line markers may also be ordered as needed to replace existing City Line markers.

RFP Amendment 1, Questions and Answers

Question #	Document Section	Page Number	Question	STA Response
8			Are there existing HPT Markers and where are they located so we can review, survey and assess to duplicate for fabrication of the new Markers to match?	These markers are installed in a number of locations throughout Spokane, WA a site visit with STA staff may be requested for bidding purposes. The best location to view all amenities is at our Plaza in downtown Spokane, which is located at <i>The Plaza, 701 W Riverside Ave, Spokane WA 99201</i> .
9			Are all the units hot dip galvanized and then cleaned up with the same paint?	Yes
10			Is it a requirement for the bidder to provide continuous on-site installation support?	No. The intention is for the bidder to be available to provide support via email, phone or in-person only if fabrication related issues arise during installation.
11			What type of files and/or production ready artwork will be provided to the awarded bidder for the Markers and Light Poles such as the vector artwork for the push through acrylic Spokane Transit logo and letters at the top of the markers as well as the high resolution artwork for the digitally printed vinyl wrap that is also for the markers?	Generally none. The Vendor will be responsible for creating their own production drawings based on the drawing provided with the RFP. STA will provide the vector artwork for the logos. The marker cladding wraps are not part of the scope of the RFP.
